

City of Beaumont

New House Permit Application Package

Updated: 2025-03-04

INCLUDES:

Application Documents

- New House Permit Application Checklist
- Permit Application
- Performance/Damage Agreement
- Declaration - Absence of Abandoned Wells on Parcel
- Fire Safety Plan

Information Documents

- Energy Code Requirements
- Plot Plan Requirements

E & OE

City of Beaumont
Planning & Development
5600-49 Street
Beaumont, AB T4X 1A1
Phone: 780-929-8782
Fax: 780-929-3300
Email: development@beaumont.ab.ca

NEW HOUSE PERMIT CHECKLIST

ALL of the requirements set out in this checklist are necessary for the review of the application and for a timely decision to be rendered. To expedite the evaluation, staff have been instructed to accept only complete applications. Property information and builder information **MUST** match what the applicant registered with New Home Warranty. Conflicting information will render the application incomplete.

- Digital submissions must be in legible, clear, to scale and in PDF format only and emailed to development@beaumont.ab.ca.
- Hard copy applications can be dropped in our after-hours drop box located at the City Office (5600 - 49 St)

APPLICATION REQUIREMENTS

- Development/Building permit application form
 - Project address & legal description ** does this match New Home Warranty?*
 - Applicant name, mailing address, phone and email ** does this match New Home Warranty?*
 - Owner information completed
 - Construction Value (Do not include cost of land)
 - All applicable fields completed
 - Ensure application is not cut off
 - signed and dated
- Performance/Damage Agreement
 - Applicant name, mailing address, phone ** does this match New Home Warranty?*
 - Project address & legal description ** does this match New Home Warranty?*
 - All applicable fields completed
 - Ensure agreement is not cut off
 - signed and dated
- Declaration re Wells
 - Applicant ** does this match New Home Warranty?*
 - Project address & legal description ** does this match New Home Warranty?*
 - signed and dated
- Architectural Final Approval from Developer (note: unapproved or preliminary architectural approval will not be accepted)
 - Project address & legal description ** does this match New Home Warranty?*
 - Applicant name (if shown) ** does this match New Home Warranty?*
- New Home Registry Approval Certificate
*All new residential construction will need to meet the requirements of the New Home Buyer Protection Act.
 For more information contact Alberta Municipal Affairs at 1-866-421-6929*
- Surveyor's Plot Plan
 - 8.5" x 14" legal size (pdf format) - Mandatory Size, surveyor's original, surveyor's original, and at scale
 - Project address & legal description ** does this match New Home Warranty?*
 - Applicant name ** does this match New Home Warranty?*
 - The dimensioned site plan must show:
 - Land Use District
 - All dimensions to scale (preferably 1:200)
 - North arrow
 - Municipal address
 - Legal land description
 - Site area and coverage
 - Area of the driveway
 - Property lines
 - Title block - showing name and contact information for designer/draftsperson
 - Front, sides and rear setback distances (building pocket)
 - Retaining walls, including height and grade (if applicable)

<input type="checkbox"/> Easement, Utility Right of Ways <input type="checkbox"/> Roadway access <input type="checkbox"/> Adjacent streets <input type="checkbox"/> Foundation outline of dwelling, cantilevers, decks, and other projections <input type="checkbox"/> Outline of all accessory buildings (if applicable)
<input type="checkbox"/> Floor and Elevations Plans <ul style="list-style-type: none"> <input type="checkbox"/> 11" x 17" tabloid size (pdf format) - Mandatory Size <input type="checkbox"/> Front elevation needs to show the building height from grade to the eaves. <input type="checkbox"/> Project address & legal description * <i>does this match New Home Warranty?</i> <input type="checkbox"/> Applicant * <i>does this match New Home Warranty?</i>
<input type="checkbox"/> Pre-engineered Roof Truss layouts and Floor System layouts <ul style="list-style-type: none"> <input type="checkbox"/> 11" x 17" tabloid size (pdf format) - Mandatory Size <input type="checkbox"/> Municipal address & legal description * <i>does this match New Home Warranty?</i> <input type="checkbox"/> Applicant/Contractor name * <i>does this match New Home Warranty?</i>
<input type="checkbox"/> Supplier's letter for Pre-engineered Structural Components <ul style="list-style-type: none"> <input type="checkbox"/> Project address & legal description * <i>does this match New Home Warranty?</i> <input type="checkbox"/> Applicant/Contractor name * <i>does this match New Home Warranty?</i>
<input type="checkbox"/> Cross Sections and Specification Details
<input type="checkbox"/> Foundation Plans, Beams, Columns, Column Loadings, Pad & Concrete Details <ul style="list-style-type: none"> <input type="checkbox"/> If ICF (insulated concrete form) is being used, it is to be shown on the drawings with the product type & manufacturer listed <input type="checkbox"/> Garage foundations, if Pile & Grade Beam system is being used, an Engineer's approved stamped drawing is required
<input type="checkbox"/> Engineer's approved and stamped drawings are required for the following: <ul style="list-style-type: none"> <input type="checkbox"/> Manufactured Stone used in Exterior Wall Cladding Systems or show conformance with Standata - 19BCV-018R1 (indicate on drawings) <input type="checkbox"/> Pile design (example: deck) <input type="checkbox"/> Tall Wall Framing Details for walls over 12' <input type="checkbox"/> Hydronic radiant floor heating - certified designer or engineer stamped system design in accordance with Standata 19-BCI-011
<input type="checkbox"/> Window Installation detail
<input type="checkbox"/> Energy efficiency documents (i.e. performance path or prescriptive path)
<input type="checkbox"/> Insulation details
<input type="checkbox"/> PERMIT FEES are calculated within the Application form. Access the current Fee Schedule from our website at www.beaumont.ab.ca <ul style="list-style-type: none"> <input type="checkbox"/> Staff will phone to arrange payment ONLY after verifying the application is complete.

Notice: City of Beaumont Fire Response Times

You are receiving this notice as a builder or developer who is actively constructing in the City of Beaumont or has submitted a permit application in 2021.

A recent assessment of Beaumont Fire Services' response times determined that Beaumont Fire Services is not able to respond to structural fires within 10 minutes of receiving a call 90% of the time.

Effective November 30, 2021, all building permit applications for Beaumont must meet construction requirements in the National Building Code Alberta Edition 2019 (NBC-AE 2019) for a location without a 10 minute response time as applicable.

The NBC-AE 2019 does not permit a phase-in or delay of the requirements once the municipality is no longer meeting the fire response threshold. Building permits issued before November 30 are not affected by this change, and existing homes do not need to be retrofitted.

Developers and builders are strongly advised to review the National Building Code Alberta Edition 2019 (NBC-AE 2019) requirements prior to starting a design and submitting their application for a building permit.

Information provided in this notice in Attachment 1 is for convenience only. Please refer to the NBC-AE 2019 to review complete requirements.

Note that this notice has been updated December 16, 2021 to include additional information about sprinkler systems.

Attachment 1: Fire Response Time and Deemed Limiting Distance - National Building Code Alberta Edition 2019 (NBC-AE 2019)

Attachment 1 - Fire Response Time and Deemed Limiting Distance – National Building Code: Alberta Edition 2019 Requirements

Last Updated: December 16, 2021

What You Need to Know

If fire department notification and scene response time exceed 10 minutes (*determined by the local fire department*), then the builder must assume that the distance between property line and the house is half for purposes of the window calculations and to determine if the construction/ cladding requirements are affected (clause 9.10.15.3.)

Information contained herein assume that the building does not have a sprinkler system.

Table: Requirements by side yard setback (distance to property line)

Side Yard Setback	Glazed openings (windows) on side wall	Exposed Wall/ Cladding	Soffits
2.4 metres or greater	No special requirements, standard construction	No special requirements, standard construction	No special requirements, standard construction
Less than 2.4 metres	No unprotected glazed openings permitted	See Note A Below	See Note A Below

Note A: Distance to property less than 2.4 m

Glazed openings (windows) on side wall:

- No glazing (windows) permitted on side wall.

Exposed wall and cladding

- 45 min fire-resistance rating required
- Must be non-combustible or combustible installed over exterior grade gypsum sheathing or over masonry or wall assembly tested

and approved to the ULC S134 standard Combustible enclosed projections (e.g. fireplace, chimneys):

- Same construction requirements for exterior wall (45 min FRR)
- Sides are to be constructed same as face, no openings
- If underside of projection exceeds 0.6 meters (23 5/8") to finished ground level then protection is required as per clause 3.2.3.6.(5)(b)

Soffits:

- Roof soffits must be protected by a material listed in clause 3.2.3.6.(5)(b) (e.g. unvented aluminum or 12.7 mm gypsum under the soffit), and have no openings if the soffit is closer than 1.2 m to the property line.
- *Interpretation note: entire soffit would require protection if closer than 1.2 m not just the exposed portion within the 1.2 m.*

Additional Notes

When the distance to property line is less than 0.45 m roof soffits are not permitted unless constructed in accordance with the City of Beaumont variance for zero lot lines.

The City's variance for zero lot lines registered May 2021 is no longer in affect at this time until the variance can be updated to reflect the change in the City's fire response times. The City strives to undertake the update as soon as practicable.

"Closure" means a device or assembly for closing an opening through a fire separation or an exterior wall, such as a door, a shutter, wired glass or glass block, and includes all components such as hardware, closing devices, frames and anchors.

Doors must have 45-minute fire resistance rating.

Windows could be protected by fire shutters. Fire shutters will require a ULC listing and supporting documentation at plan review stage of the permitting process. Shutters are cost prohibitive in many cases and aren't common practice as a result.

"Fire compartment" means space in a building that is enclosed by exterior walls or is separated from all other parts of the building by enclosing construction providing a fire separation having a required fire-resistance rating.

Sprinkler Systems

Installation of a sprinkler systems is not required. Installation of a sprinkler system changes what NBC-AE 2019 requirements apply and therefore information about this option is presented below.

Installation of a sprinkler system will allow for windows along the side wall and removes the requirement to have a 45 minute fire rated assembly on the side wall (clause 9.10.15.3).

Sprinkler system must be shown and supporting documentation must be provided at plan review stage of the permitting process.

Applicant Authorization

1. I am the owner/agent with the consent and authority of the owner that is the subject matter of this permit application.
2. I give consent to allow authorized person pursuant to the Municipal Government Act Section 542 the right to enter the land and/or building(s) with respect to this application.
3. I understand this is only an application and does not constitute approval to commence construction.
4. I acknowledge that notification fees associated for a discretionary use or variance application will be billed to me separately at cost. I will be notified of required payment of these fees via email that I have provided on this form. I am aware that not paying these fees promptly will cause delays in the review of my application.
5. I declare that the information contained in this application is correct and true to the best of my knowledge.
6. I declare that I will notify the Development Authority of any proposed changes to the plans submitted with this application.
7. I consent to receiving notifications & correspondence regarding this application via email to the address provided on this application.
8. By checking the "I agree" box, you agree and authorize your electronic signature to be valid and binding upon you to the same force and effect as a handwritten signature

The personal information requested on this form is being collected under the authority of Section 33(c) of the Freedom of Information and Protection of Privacy (FOIP) Act. The information collected will be used for the purpose of permit review and inspection processes and may be communicated to relevant City Business Units, utility providers, and Alberta Health Services. It may also be used to conduct ongoing evaluations of services received from City Business Units. The name of the applicant and the nature of the permit will be available to the public. If you have any questions about the collection or use of your personal information, contact the City of Beaumont's FOIP Coordinator at 5600-49th Street, Beaumont, Alberta, T4X 1A1 or 780.929.8782.

PERFORMANCE/DAMAGE PILOT AGREEMENT

Applicant Name:		Phone:	
Mailing Address:			
Property Address:			
Legal Description:	Lot:	Block:	Plan:
Receipt Number:		Application Date:	

1. The Applicant agrees to construct a hard surfaced parking area, set rough grades per design elevation (inclusive of obtaining rough grade acceptance from the City), (as evidenced by the provision of a rough grade certificate); ensure the emergency sump discharge is installed properly; ensure the CC (curb stop) valve is operational and set at the final grade elevation; and, comply with the requirements of the development permit and the Land Use Bylaw. These items must be completed within 18 months of the date of final building occupancy, otherwise the Applicant will be charged for the completion of these items.
2. All trees that are identified by the City on the Development/Building Permit as requiring protection shall be adequately protected during development to ensure they are not disturbed or damaged in any way by development activity. Where damage to protected trees is noted by the City, the cost of tree replacement or a portion thereof will be charged to the Applicant.
3. The Applicant shall promptly, and in any event within thirty (30) days of the City's notice, repair, and if necessary replace, any damage to sidewalks, streets, curbs, gutters, cc (curb stop) valves, grading, land, and any other improvements, infrastructure, or utilities caused by the Applicant, their agents, contractors or employees in connection with the development of the above described lands.
4. The Applicant agrees to indemnify and save the City of Beaumont harmless from and against all claims, costs, expenses and charges related to or incidental to damage to and repair and replacement of sidewalks, curbs, gutters, cc (curb stop) valve(s), grading, land and other utilities and improvements in connection with the development on the above described land necessitated by damage or the negligence by the Applicant, their agents, contractors or employees.
5. Where damage to sidewalks, curbs, gutters, cc (curb stop) valves and/or the Emergency sump discharge is/are noted by the City and not promptly repaired or replaced as required herein, the City may undertake the repairs and/or replacement at a time when conditions permit. The cost of any repair and or replacement will be charged to the Applicant. The invoice(s) shall be paid within 30 days of issuance. Any amounts not paid when due shall be subject to interest at a rate of 1.5% per month from the due date until paid in full.
6. The Applicant acknowledges that they will be invoiced and required to pay the City of Beaumont for any of the said costs, expenses or charges of any repairs, construction, and/or replacement, as described above.
7. With regards to the asphalt, sidewalk and curb located at the above-mentioned property, the Applicant acknowledges that it is their responsibility to thoroughly assess and document existing infrastructure conditions, including but not limited to the sidewalk, curbs, and the operational status of curb stop (CC) valves, prior to the commencement of construction. The City will perform one inspection at the point of passing rough grade. If damages are observed at that time, the Applicant shall be responsible for repairing such damage. The Applicant is required to provide adequate proof of any pre-construction damages to the satisfaction of the City. Failure to provide such proof will result in the Applicant accepting full responsibility for any observed damage.
8. The Applicant acknowledges that they are participating in a pilot program to evaluate the benefits of removing the previous \$3,000 deposit requirements associated with this agreement. The City may, in its sole discretion, terminate this pilot project and upon such termination, the Applicant shall pay to the City a \$3000.00 deposit which will be held by the City as security for the performance of the Applicant's obligations herein, and applied by the City towards its costs if the Applicant fails in performance. The City reserves the right to amend the terms of this pilot project, or revoke this pilot at any time.
9. Any breach of this Agreement by the applicant shall be a contravention of the Applicant's development permit for the above described lands.

SEE NEXT PAGE FOR INFORMATION

DECLARATION – ABSENCE OF ABANDONED WELLS ON PARCEL

Why do I need to disclose information about abandoned wells on my parcel?

New Requirements

Effective November 1, 2012, the Subdivision and Development Regulation (Alberta Regulation 160/2012) has changed. The changes relate to the Subdivision and Development requirements around abandoned well sites. The new provisions require some changes to our business practices.

In addition to our current application submission requirements, all new Development Permit and Subdivision Applications must include the following:

Development Permit Application

An application for a development permit for **a new building that will be larger than 47 square meters, or an addition to or an alteration of an existing building that will result in the building being larger than 47 square meters**, must include:

- Information provided by the Energy Resources Conservation Board (ERCB) identifying the location or confirming the absence of any abandoned wells within the parcel on which the building is to be constructed, or, in the case of an addition, presently exists.
- This information can be obtained by either contacting the Energy Resources Customer Care Centre at 1-855-297-8311 (toll free) or using the GeoDiscover Alberta Map at: https://maps.srd.alberta.ca/GDA_View/Viewer/Viewer.aspx?Viewer=GDA to confirm whether an abandoned well is located on your property.

If you **do not have an abandoned well site on your property**, you will be required to fill out the “Declaration – Absence of Abandoned Wells on Parcel” form and include it with your development application.

If you **do have an abandoned well on your property**, you will be required to meet the requirements as set out in ERCB’s Directive 079.

The information is not required if it was submitted to the same development authority within the last year.

The following links provide further information on the added provision.

Information Bulletin, Alberta Municipal Affairs:

Fire Safety Plan for Construction/Renovation (Small Buildings)

THIS PLAN MUST BE POSTED AT EACH JOB SITE AND EMPLOYEES ARE EXPECTED TO BE TRAINED IN HOW TO FOLLOW ITS PROVISIONS

Applicant:	
Project Address:	
Subdivision:	
Description of Project:	

General Considerations:

- A warning system will be in place at all sites to warn of potential threats, and facilitate evacuation
- Each site will have a muster point where workers can be accounted for
- A method of notifying the fire department, or other emergency agency shall be available at all times
- Fire extinguishers will be available at all times at every site while workers are present
- Access to fire hydrants and buildings for fire apparatus must be maintained

Hazard Control:

- At the end of each day combustibles will be cleared from the site area, disposed of in bins, or stored in neat piles
- No open-flame devices will be used inside buildings unless a dedicated watch is in place – this includes hot works
- LPG tanks or flammable liquids containers are not allowed within buildings

Emergency Response Numbers:

FIRE/POLICE/AMBULANCE: 9-1-1

Contact Personnel:

Provide a list of names and telephone numbers of person(s) to be contacted during non-operating hours or in emergency situations. (Available 24 hrs.):

Name:	Name:
Phone:	Phone:

This plan is designed in conformance with Section 2.8.2 of the National Fire Code -2019 Alberta Edition, and on signature, becomes an agreement between the building owner/contractor and Beaumont Fire Services.

Muster Point Location	

IN CASE OF A FIRE EMERGENCY

Upon discovery of fire

- Leave fire area immediately.
- Close all doors behind you. Turn off equipment if safe to do so.
- Notify occupants verbally, sound horn or activate fire alarm system.
- Call the Fire Department by dialing 9-1-1 on a telephone from a safe location.
- Use nearest exit, do not use man lifts or elevators.
- Try to extinguish a very small fire only.
- If you have the slightest doubt about whether or not to fight the fire – DON'T. Instead, evacuate, and close the door behind you to slow the spread of fire.
- Go to muster point, stay there until instructed to do otherwise.
- A supervisor must await the arrival of the Fire Department at a location that is safe to do so.

Upon hearing of a fire event

- Turn off equipment.
- Use the nearest exit; do not use man lifts or elevators.
- Close all doors behind you where practical.
- Go to the designated mustering point, be accounted for.
- Do not leave the designated muster point until instructed to do so.
- Designates must account for all people expected to be on site and report any missing persons to the Fire Department and local authorities.

2014 9.36 Energy Efficiency Information Required on Drawings

Choose one of the 4 options below to achieve *Energy Efficiency* compliance for Zone 7A

1. Prescriptive Path: Drawings shall show and meet all information required below.
(ABC 9.36.2-9.6.4)

- Applies to all Part 9 "C" residential occupancies
- Applies to Part 9 D & E & F3 buildings under 300m² floor area

2. Prescriptive Path with Trade Off: Drawings shall show all information below PLUS provide calculations of trade-offs used for any deviations from the minimum requirements.

- Applies to all Part 9 "C" residential occupancies
- Applies to Part 9 D & E & F3 buildings under 300m² floor area

3. Performance Path: Drawings shall show all values PLUS a performance report (ABC 9.36.5) of the proposed building in question with values matching the drawings. Must be site specific and contain credentials of the person performing the report & the software system used.

- Performance path may only be applied to dwellings and residential buildings with common spaces not exceeding 20% of the total floor area. Not an option for commercial/industrial occupancies

4. NECB: Building must conform to the requirements stated within the NECB.

- Can be applied to all buildings but not beneficial to residential or small commercial buildings

The requirements below are the minimum values for each assembly/product under the **Prescriptive Path**. Regardless of the *Option 1-4* used above, the assemblies shall be listed on the drawings showing their proposed values. Should any value be less than the minimum, trade-off calculations shall be provided for each deviation from the minimum - except where the **Performance Path** is chosen. Below requirements are the **"effective"** values not product alone values.

HRV Proposed Use this Column

No HRV Proposed use this Column

Above-Ground Assemblies	Minimum ETR (m ² K/W) (RSI)	Minimum ETR (m ² K/W) (RSI)

Minimum Efficiency Values For

Windows	Maximum "U" value 1.60	9.36.2.7.A (min ER rating of 25)
Exterior Doors	Maximum "U" value 1.60	9.36.2.7.A
Single Exterior Door	Maximum "U" value of 2.60	9.36.2.7 (5)
Glass Block	Maximum "U" value of 2.90	9.36.2.7(4) up to 1.85m ² area
Skylights	Maximum "U" value of 2.70	9.36.2.6 (4)
Attic Access	Minimum "R" Value of 15	9.36.2.7 (8)
Garage Overhead Door	Minimum "R" Value of 6	9.36.2.7 (7)
Gas Furnace	Minimum Performance of 92%	222,000 Btu/h or less
Gas Water Tank	Minimum EF of >0.67	77,000Btu/h or less
Combo Water Tank/heat	Minimum TPF 0.65	250,000Btu/h or less
Boiler	Minimum TPF 0.65	308,000Btu/h or less
Electric Water Tank	See 9.36.4.2 Chart	454L or less
Tankless Water Heater	See 9.36.4.2 Chart	
Water line Insulation (interior)	½" insulation	Distance of 2M from inlet & outlet of tank
Water line Insulation (exterior)	Same "R" value required for exterior walls above grade	Entire distance where located outside the building envelope

The information above is only a guideline to assist with a successful permit application. The information above shall be shown on the drawings submitted in support of a permit application. The values shown are the **effective values** which must take into consideration thermal bridging such as wall studs, lintels etc. which reduce the **actual effective values**. Should any information be missing, inaccurate or not meet the minimum requirements, the permit application may be refused therefore prolonging the permit issuance. The applicant is responsible to provide the required information and to understand the basic minimum Building Code requirements. The applicant shall be responsible to direct onsite activities and instruct the installation of appropriate systems to meet the minimum energy efficiencies. A Safety Codes Officer will verify compliance onsite to the approved drawings by way of a site inspection. Deviations from the submitted drawings shall not be accepted without a secondary review by Safety Codes Officer. A fee may be applied for a secondary review where substantial deviations warrant a 2nd review. Additional information/calculations may be required from the applicant for a secondary review to be performed. Should a deviation after construction is completed not be verifiable by way of calculations, a blower door test or performance modeling may be required prior to occupancy being granted.

The above requirements may not cover all the requirements in your construction, or changes made on site. The owner is still responsible for full compliance with the requirements of the Alberta Building Code 2014. If you have any questions, please contact the City of Beaumont office at (780) 929-1363.

When submitting a New House Development and Building Permit application please ensure that the house and any attached garage and/or deck over 0.60m in height fits entirely within the
